DAMILOLA AJAO

Austin, TX | dammi.ajao@gmail.com | LinkedIn | Portfolio | medium.com/@dammi.ajao

EDUCATION

MS Information Studies, UX Concentration | *The University of Texas at Austin, Austin, TX | Expected May 2027*
BS Econometrics and Quantitative Economics, GPA: 3.89 | *University of South Florida, Tampa, FL | May 2022*

UX RESEARCH & DESIGN PROJECTS

NaviGATE *Fall 2025*

- Conducted surveys with 24 participants and 10 user interviews to uncover navigation pain points and user mental models around navigation, informing the project's scope and design direction.
- Translated research findings into a mobile navigation game with three progressive levels that gradually reduce navigation assistance, helping users build familiarity with routes and navigate independently.
- Evaluated the prototype through think-aloud testing and a cross-team heuristic evaluation, using feedback to improve route-list visibility, clarify level progression, and replace the health bar with a hearts-based system that better matched users' mental models.

ADHD Buddy *Fall 2026 (In Progress)*

- Synthesized survey responses from 27 undergraduate and graduate students, including 14 who reported ADHD, alongside existing research to identify feature priorities, favoring structured task management over game-based rewards and constant notifications.
- Applied research findings to help shift the team's initial game-based concept toward a structured planning tool, with games repositioned as optional breaks.
- Designed a 10-screen low-fidelity Canvas plug-in prototype incorporating prioritized features, including assignment breakdowns, focused workspaces, and a space to capture distracting thoughts.

College Funding Website Redesign *Fall 2026 (In Progress)*

- Audited the client's website using Screaming Frog, identifying 47 empty pages, 19 broken links, and 46 duplicate or near-duplicate pages, giving the client visibility into existing content and site health issues.
- Conducted a card sort with 11 participants to understand how students and families expect college funding information to be organized, identifying gaps between user expectations and the existing navigation structure.
- Presented preliminary research findings to the client, highlighting content and site health issues to inform the next phase of the redesign.

PROFESSIONAL EXPERIENCE

Goldman Sachs | Asset & Wealth Management Compliance *Salt Lake City, UT*
Compliance Analyst *Aug 2022 – May 2025*

- Redesigned existing compliance training modules in Articulate 360 and PowerPoint, allowing new business employees to complete required onboarding independently and reducing administrative time spent coordinating training sessions.
- Streamlined quarterly employee registration reporting across 200,000+ rows using Excel macros and pivot tables, reducing report generation time by 25%.
- Reviewed approximately 12 client-facing marketing materials weekly across investment products, flagging compliance issues before publication to help mitigate regulatory risk under FINRA and SEC advertising requirements.
- Designed and delivered compliance training to 100+ cross-functional employees, including targeted sessions that significantly reduced a team's logged violations within a year.
- Led data cleaning and analysis for the annual forensic review of gifts and entertainment above the firm's limit, consolidating findings into a single executive report for senior management, developing a repeatable methodology for future reviews.

KPMG | Data & Analytics Intern *Lagos, Nigeria | Jul 2021 – Aug 2021*

- Conducted market research and competitor financial analysis, organizing findings into summaries for the IT Research & Development team.

RECOGNITION

Goldman Sachs Analyst Impact Fund | Semifinalist *2023*

- Developed a data-driven pitch for a mental health nonprofit that secured $5,000 in funding.

SKILLS & TOOLS

UX Research: Surveys, user interviews, think-aloud testing, card sorting, content audits, affinity mapping, heuristic evaluation, personas
UX Design: Information architecture, storyboarding, wireframing, low-fidelity prototyping
Tools: Figma, Google Forms, Screaming Frog, Excel, Articulate 360 (Storyline), PowerPoint, Python (basic), Claude
